TAXWARE to Quantum Returns Link

Do you need someone to link the TAXWARE SALES/USE Tax System to the Vertex Quantum returns Sales Tax return system?

The TaxAutomation Link was designed to convert the TAXWARE audit file into the Vertex Quantum import format. This program is typically used once a month and will save the average user significant manual processing time. The TaxAutomation Link is a very easy to use, stand alone, independent utility that:

- Reads the TAXWARE audit file (leaving the TAXWARE audit file unchanged)
- Automatically produces a Quantum compatible (converted and pre-formatted) file that is ready for direct import into your Quantum Returns package.

Special features:

- The Link will summarize transactions by jurisdiction and company (or division) and then create a file that can be directly imported into the Vertex tax return system
- The user has the option to consolidate companies (or divisions) onto one or more tax returns
- The reconciliation report is used to reconcile the TAXWARE Tax030 report to the actual Quantum tax returns.

TaxAutomation will configure your Link using the Quantum Returns specifications that were provided as part of your Quantum Returns implementation. The TaxAutomation Link typically requires 2 to 5 days of installation, custom configuration and testing time by a TaxAutomation consultant. Complex users may require additional time.

Why choose the TaxAutomation TAXWARE to Vertex Quantum Returns Link?

- TaxAutomation will save you time & money. Do not write your own software when you can buy the TaxAutomation software link for a fraction of the cost to develop your own.
- It works. The TaxAutomation Link is a proven commodity that is already in use.
