

TaxAutomation

THE TAXWARE TUNE-UP

Optimize your TAXWARE SALES/USE tax system with a Tune-up from TaxAutomation. TaxAutomation has extensive successful experience configuring the TAXWARE Sales/Use tax system. TaxAutomation is certified by TAXWARE International, Inc. for implementation, training/knowledge transfer, installation, and support services.

The TAXWARE Tune-up service is available to all TAXWARE SALES/USE tax system users and is intended to optimize (fix/repair/complete/troubleshoot) configuration of the system. Our Tune-up projects also incorporate employee training/knowledge transfer to both Tax and IT personnel.

TaxAutomation consultants are experienced ERP programmers with an extensive knowledge of the TAXWARE system.

Steps in the Process

Phase I - Data Gathering & Analysis

Depending on the size and complexity of your TAXWARE installation, the first phase of the TAXWARE Tune-up will require one consultant at your office for one day to:

- Review your issues and objectives.
- Test the TAXWARE system.
- Identify & document potential system improvements.
- Estimate the time and resources needed to accomplish the improvement objectives.

Phase I deliverables include an estimate of total billable hours and expenses for the entire Tune-up project and a Phase II work plan outline.

Phase II - The TAXWARE Tune-up engagement team will optimize your TAXWARE SALES/USE tax system.
